

PhD in Economics & Management

Statistics

Instructor: Catia Scricciolo

Syllabus a.y. 2020/21

TEXTBOOK: **Introductory Econometrics: A Modern Approach, Fourth Edition. Jeffrey M. Wooldridge**

APPENDIX B

Fundamentals of Probability 714

B.5 The Normal and Related Distributions 737

The Normal Distribution 737

The Standard Normal Distribution 738

Additional Properties of the Normal Distribution 740

The Chi-Square Distribution 741

The t Distribution 741

APPENDIX C

Fundamentals of Mathematical Statistics 747

C.1 Populations, Parameters, and Random Sampling 747

Sampling 748

C.2 Finite Sample Properties of Estimators 748

Estimators and Estimates 749

Unbiasedness 750

The Sampling Variance of Estimators 752

Efficiency 754

C.3 Asymptotic or Larger Sample Properties of Estimators 755

Consistency 755

Asymptotic Normality 758

C.4 General Approaches to Parameter Estimation 760

Method of Moments 760

Maximum Likelihood 761

C.5 Interval Estimation and Confidence Intervals 762

The Nature of Interval Estimation 762

Confidence Intervals for the Mean from a Normally Distributed Population 764

A Simple Rule of Thumb for a 95%

Confidence Interval 768

Asymptotic Confidence Intervals for Nonnormal Populations 768

C.6 Hypothesis Testing 770

Fundamentals of Hypothesis Testing 770

Testing Hypotheses about the Mean in a Normal Population 772

Asymptotic Tests for Nonnormal Populations 774

Computing and Using p-Values 776

The Relationship between Confidence Intervals and Hypothesis Testing 779

Practical versus Statistical Significance 780

C.7 Remarks on Notation 781

Summary 782

Key Terms 782

Problems 783
